

## THE VALUE OF UNIPORTAL VATS

Henrik Jessen Hansen  
*Rigshospitalet, University of Copenhagen*

Uniportal VATS has developed dramatically in the last decade and can for sure be used for the majority of all thoracic procedures. It can be taught and reproduced and seems naturally as the next step to minimize the surgical trauma. Data from published scientific papers will be presented specifically with a focus on short-term benefits.

Other non-strictly medical or scientific arguments for the method will also be presented.

Warning - humor will occur ...
